SUMMARY

Flutter Developer with production experience shipping 7+ published apps across ride-hailing, delivery, mobility, wallet, and enterprise ERP domains, serving users in 3 countries. Specialized in Clean Architecture, BLoC/Cubit, Firebase, Google Maps, real-time tracking, payment integrations, and CI/CD. Experienced in delivering production releases for Android within Agile/Scrum teams.

SKILLS

- Mobile & Architecture:** Flutter, Dart, Android, Kotlin, Clean Architecture, BLoC, Cubit, Provider, MVVM, MVI, SOLID, Dependency Injection (GetIt/Injectable)
- APIs & Backend:** REST APIs, Dio, Retrofit, Firebase (Auth, Firestore, FCM, Crashlytics, Analytics), Supabase, JSON Serialization, Hive
- DevOps & Integrations:** CI/CD, GitHub Actions, Codemagic, Fastlane, Firebase App Distribution, Google Maps, Geolocation, Stripe, PayPal, Unit/Widget/Integration Testing
- Practices & Tools:** Agile/Scrum, Git/GitHub, Jira, Clean Code, Code Review, AI-Assisted Development
- Web:** React, Next.js, Node.js
- AI (secondary):** LLM integrations, RAG, embeddings-based retrieval

WORK EXPERIENCE

- Black Falcons — Cairo, Egypt (Remote)** Mar 2026 – Present
Flutter Developer | Full-time
- Build and ship production Flutter applications for ride-hailing, delivery, shipment, and wallet platforms, covering customer, driver, and operational workflows.
 - Architect scalable feature modules using Clean Architecture, BLoC/Cubit, Dio/Retrofit, Firebase, and Google Maps.
 - Implement end-to-end authentication, trip lifecycle, live GPS tracking, push notifications, localization, wallet, and safety/SOS flows.
 - Own release pipelines: Firebase configuration, app signing, build debugging, and CI/CD workflows via GitHub Actions for Android.
 - Collaborate with backend, QA, design, and product teams in Agile/Scrum sprints to deliver stable production releases.
- Takamul Al-Bayanat — Saudi Arabia (Remote)** Jul 2026 – Present
Mobile & ERP Solutions Developer | Part-time
- Engineer enterprise ERP and POS mobile applications with multi-printer thermal routing, offline-first caching, and real-time database synchronization.
 - Implement ZATCA e-invoicing compliance, automated tax calculations, and QR code generation for Saudi market requirements.

SELECTED PUBLISHED APPS

- Moov24 Rider** — Mobility & delivery app (Syria/Germany): BLoC/Cubit, Dio/Retrofit, Firebase, Google Maps, WebView, Codemagic. [Google Play](#) | [App Store](#) | [Demo](#)
- Moov24 Captain** — Driver-side app: trip management, earnings tracking, live navigation, real-time sync, push notifications. [Google Play](#) | [App Store](#) | [Demo](#)
- Taxi Massar Rider** — Ride-hailing app (Iraq): booking flow, live GPS tracking, wallet, referrals, notifications, SOS. [Google Play](#) | [App Store](#)
- Taxi Massar Captain** — Driver app: registration, trip lifecycle, earnings dashboard, wallet, in-app chat, background location. [Google Play](#) | [App Store](#)

EDUCATION

- B.Sc. in Computer Science — Sinai University** 2021 – 2025
CGPA 3.4/4.0 — Very Good with Honors. Coursework: OOP, Data Structures, Algorithms, Databases, Operating Systems.

TRAINING

- Information Technology Institute (ITI) — Professional Training** Jan 2026 – May 2026
Intensive program: frontend, backend, mobile development, APIs, Git workflows, and agile teamwork. Stack: React, Next.js, Node.js, Flutter.
- Elevate Flutter Training — Cairo, Egypt** Jun 2025 – Dec 2025
Production-level Flutter: Clean Architecture, BLoC, Firebase, REST APIs, Google Maps, testing, CI/CD, code review, Agile/Scrum.
